Please insert your abstract's content here. The contents should be placed directly within the *document*-environment, following the *maketitle*-command. Please do not use any sectioning commands (such as *part*, *section* . . .) or the *abstract*-environment as they have been disabled.

Important! The amount of space available for your abstract (title and authors included) is limited! The total allowed text height is 125mm, corresponding to about 20 lines of content (depending on the title length, the number of authors, the number of paragraphs. . .). If your abstract is too long, an error or warning is raised (depending on the '*excess*' class option). Note that excess content will **NOT** be included in the booklet of abstracts.
